The collaborative browser based IDE

Replit is a simple yet powerful online IDE, Editor, Compiler, Interpreter, and REPL. Code, compile, run, and host in 50+ programming languages.

🔗 <https://replit.com/>

```
alert('Salom dunyo');
```

▼ Javascript fayl ulash

Javascript asosan 2 xil ko'rinishda veb sahifaga bog'lanadi:

<script> tegi orasida kerakli Javascript kodlar yozib ketiladi va veb sahifa ochilganda ishga tushadi

```
<!DOCTYPE html>

<html>

<head>
  <title>Javascript</title>
  <script>
    alert('Salom dunyo');
  </script>
</head>
```

```
<body>
  ...
</body>

</html>
```

`<script>` tegining `src` attribute orqali tashqi JS fayl ulanadi

```
<!DOCTYPE html>

<html>

<head>
  <title>Javascript</title>
  <script src="./app.js"></script>
</head>

<body>
  ...
</body>

</html>
```

```
alert('Hello world');
```
